

**Christian Kirchnawy** studied food and biotechnology in Vienna. Since his diploma thesis in 2010 he is working on the safety assessment of food packaging by a combination of in-vitro bioassays and chemical analysis. For his PhD thesis in technical chemistry, he developed test methods for the detection of endocrine active substances. Since 2011 he is leading the Microbiology & Cell Culture department at OFI. The main focus of his work is on the safety assessment of food contact materials and medical devices.
