

CV Maricel Marin-Kuan

Maricel Marin-Kuan, got Ph D degree in molecular biology from the University of Lausanne in Switzerland. Today, senior in vitro toxicology scientist at Nestlé Research in Switzerland. Key contributions in the safety-by-design area bringing solutions in the food quality and safety challenges for prioritization and decision-making. With over 20 years' experience, she acquired compelling knowledge for the development of new strategic in vitro tools to address key toxicological issues of food and food-related areas including food contact materials. Leading AOAC working groups to advocate for "Best Practices of in vitro bioassays for mixtures applications".
